

# Iowa Strategic Goals Program Workshop

## DOT Hazardous Waste Regulations & Strategies of Zero Landfill

Regulations. By law you are required to comply. However, compliance requirements can often seem overwhelming and confusing, and rule changes can catch you completely off guard and leave your head spinning.

Wouldn't it be nice if regulators would provide hints and tips to help you better understand what is required of your business? Would you like the opportunity to meet with regulators and industry experts in a small setting where questions are welcome? This workshop provides just that opportunity.

**Join us** at the Iowa Strategic Goals Program 1-day workshop on November 5<sup>th</sup>, 2014. In the morning, attendees will hear from Iowa DOT haz-mat experts regarding DOT's Hazardous Waste Transportation Regulations, and will learn more about company liabilities regarding disposal of hazardous waste. In the afternoon, we'll transition to a concept that has been gaining traction across the nation, including in Iowa – the pursuit of 'zero landfill' status. Learn more about what it means to be zero landfill, what resources are available to help, and hear directly from two Iowa companies who have been pursuing zero landfill initiatives in their own facilities.

Both sessions provide plenty of time for open discussion / Q&A, so take advantage of this opportunity to learn, network and share ideas!

This workshop is the 16th in a series offered by the Iowa Strategic Goals Program. Open to all Iowa manufacturers, the materials presented will apply to a broad range of industrial sectors. The following comments were received from previous workshops:

- "Good information presented – relevant to all types of industries."
- "Very good class, good information, timely topics."
- "Speakers were very well educated in topics discussed."
- "I think this is a great forum to allow businesses to get good compliance information with the regulatory agencies."

*Sponsored by the Iowa Strategic Goals Program in partnership with U.S. Environmental Protection Agency's Region 7, the Iowa Department of Natural Resources and the Iowa Waste Reduction Center.*
